

Cricket Video Assessment and Coaching Opportunity

At Nov 2006

from
\$46

Sports & Spatial Services Pty Ltd

is pleased to present an opportunity for cricket players to have their technique recorded on video and analysed using **Quintic** sports science software.

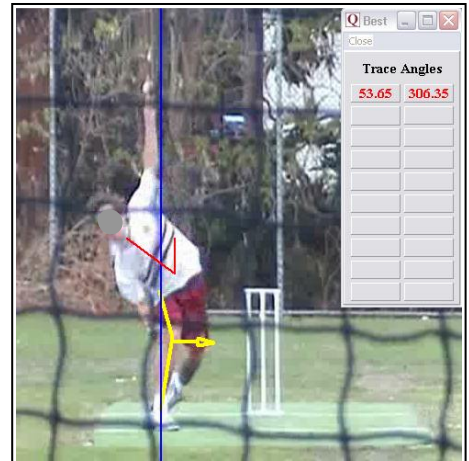

Technology that has been available almost exclusively to elite athletes in the past is now more readily available - at affordable cost.

Sports & Spatial Services Pty Ltd can tailor an assessment program to suit your requirements for video analysis and/or coaching, whether:

- ✚ One-off, or recurring periodically;
- ✚ Individual one-on-one;
- ✚ Small group or Team;
- ✚ Whole Club

The benefits of video analysis include:

- ✚ generation of quality information for coaches
- ✚ powerful communication with athletes
- ✚ technique improvement and injury mitigation
- ✚ professional development for coaches

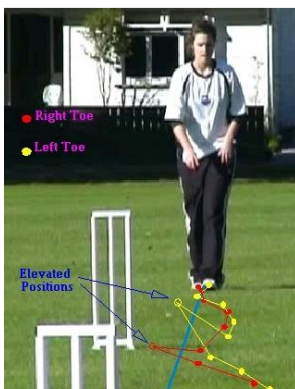

If you are serious about providing development opportunities for your players, you cannot afford to be left behind in the adoption of this technology.

To get started:

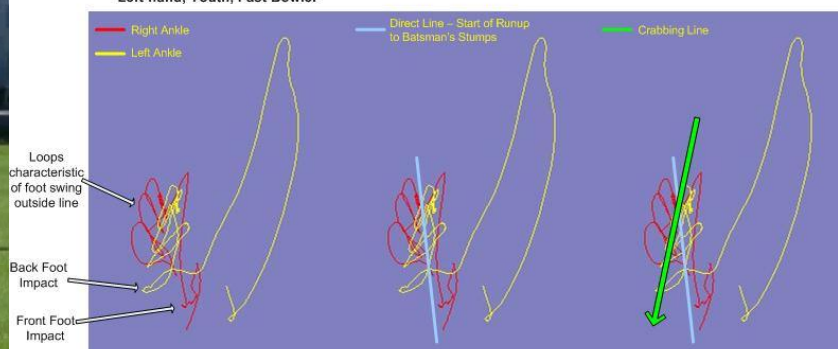

- a) download trial software for 21 days' free use (from www.quintic.com), or
- b) contact **Sports & Spatial Services** to discuss an assessment program or trial, a demonstration or a workshop

If a Club or Association wishes to pursue video analysis in its own right, Sports & Spatial Services Pty Ltd can assist with:

- ✚ acquisition of software and systems, and
- ✚ training of coaches and others as required.
